The network user is then given the option to accept all of the change(s) to the card, as illustrated by decisional step 732. The data representing the customizations to a card are stored in database 280, as illustrated by procedural step 734. For example, Card Detail Detail (CardDetDet) Table 408 stores the specific pieces of text, the position, the color, font, etc., as well as information for any image data, photographic or scanned, as in step 760, that has been uploaded to web server 260.
